Hi Debra,

Yes, we can provide some feedback on this. I have looped in Michael and Kris as they helped with the pollinator section of the aldicarb action.

Subject: Question on AgLogic 15GG-OG Pollinator Studies

Hi, Debra and Shanta,

I'm working with the lab to prepare the Tier II protocols for the pollinator studies for AgLogic 15-GG-OG (EPA Reg. No. 87895-7). For the tunnel study, the condition of registration listed one of the tier II studies as "Non-

Guideline: (OECD 75) Semi-field testing for pollinators (tunnel or colony feeding studies)". Can you confirm if EFED wants this study conducted in citrus? If EFED does want that study conducted in citrus, then the OECD 75 type of study cannot be conducted in citrus, but the citrus study could be carried out following European Plant Protection Organization 170 guidelines. If EFED wants the OECD 75 study, then that study could be carried out using either buckwheat or wild mustard. Their response will help with preparation of this study protocol.

Thanks!

Ann
